- ✓ Reduces moss, mould, and algae growth.
- ✓ Roof tiles retain a natural look, does not alter the appearance.
- ✓ Will not etch, alter, or discolour roof tiles.
- ✓ Highly breathable, allowing water vapour to escape.

### HOW IT WORKS

Aqua Shield HD ® roof tile sealer works using advanced fluorine chemistry technology which reacts with the surface pores, leaving an invisible, breathable, protective barrier against many types of staining. Most importantly it allows water to run off roof tiles quickly and easily. This reduces “weight stress” which can lead to costly structural repairs. Aqua Shield HD ® roof tile sealer is a premium fast curing sealer, ideal for all types of terracotta and concrete roof tiles.

### SUITABLE SURFACE TYPES

Designed for terracotta and concrete roof tiles, new and old.
